

On average, Americans toss 8 billion plastic bags a month.

Help Us Reduce Waste!

Make a Reusable Bag!

Turn an old T-shirt into a reusable bag in just three simple steps:

1. Turn the shirt inside out and cut off each sleeve.
2. Using a medium bowl, trace a scoop in the neckline, and cut along that line.
3. Sew across the bottom hem. Turn the shirt right-side out, and it's a reusable bag!

Bring it home and personalize with your own design, using markers, patches, etc.

Invite others to do the same!
